

HIGHER GROUND  
CALVARY CHAPEL

# SCHOOL OF MINISTRY

Apologetics  
Class Five  
The Case for Creation

---

---

---

---

---

---

---

---

Psalm 100:3:

“Know you that the Lord, He is  
God: it is He who has made us,  
and not we ourselves...”

---

---

---

---

---

---

---

---

Welcome to our class on the  
Case for Creation

I am going to do this class a  
little bit different

I want to open this class with  
the legal need for Creation  
versus Evolution

---

---

---

---

---

---

---

---

I am going to begin presenting the Genesis account of Creation as if it were God's testimony in a civil court proceeding

God is protecting His copyright on the earth and mankind

---

---

---

---

---

---

---

We do not realize that if we hold to evolution, the authority of God is removed from our world

And rather than loving and accepting God, logic demands that we reject and fight God

---

---

---

---

---

---

---

I then want to deal with the Science involved in Creation versus Evolution

Are we dealing with six 24-hour days for Creation?

Is the earth only thousands of years old and not billions

---

---

---

---

---

---

---

The reality is that there are many fields of science that address these issues and we do not have billions of years tonight to discuss them all  
So I will present several of the most compelling arguments

---

---

---

---

---

---

---

---

Obviously, I am not an expert in these fields of science  
I am only summarizing and presenting their findings

---

---

---

---

---

---

---

---

Does it really matter whether we believe in Creation or Evolution?  
My initial response many years ago was, "No, it is just a matter of personal opinion."  
Now I believe that it really does matter...

---

---

---

---

---

---

---

---

C. S. Lewis was a brilliant man  
He was almost impossible to  
defeat in a debate  
One of his techniques was to  
take the statement an  
opponent made and then  
follow the logic of that  
statement to its logical end

---

---

---

---

---

---

---

---

Let me do that with the issue of  
Creation v Evolution...  
God opened the Bible up with  
this declaration:  
“In the beginning God created  
the heavens and the earth...”

---

---

---

---

---

---

---

---

The word for “created” in the  
Hebrew is the word “bara.”  
“Bara” means to make out of  
nothing  
This is essential to God’s  
position

---

---

---

---

---

---

---

---

Let's shift the first two chapters of Genesis off the pages of a book and set them up as the transcript of the civil court in the case of God versus everybody

---

---

---

---

---

---

---

---

Let me describe the issues in this case...  
God is claiming to have made everything out of nothing  
The opposing party challenges this claim and has filed a counter-claim that God did not make anything

---

---

---

---

---

---

---

---

If this were a case involving the copyright of a manuscript, the author would take the stand, make his/her declarations and then submit evidence to prove that they wrote the manuscript and not someone else

---

---

---

---

---

---

---

---

The author would do this by demonstrating intimate knowledge of how the manuscript came to be and then provide evidence showing how the book came to be written

---

---

---

---

---

---

---

---

In Genesis 1:1 God is presenting His opening statement: "I made everything."  
"I made it out of nothing"  
"No one helped me"  
"I did not use any materials provided by anyone else"

---

---

---

---

---

---

---

---

Why is this important?  
Unless God made everything out of nothing and without any help, God cannot establish His copyright over the earth, and through the earth, all of mankind

---

---

---

---

---

---

---

---

God's legal position is not focused on the heavens.  
He makes that claim, but He does not defend His ownership of the heavens  
That is not important to His case

---

---

---

---

---

---

---

---

He shifts to the earth  
The earth is essential to His position and to His case  
"The earth was without form and void"  
This describes a gaseous nebula cloud in space

---

---

---

---

---

---

---

---

His testimony would basically follow the Nebula Theory of Creation  
This theory holds that all planets and stars started out as dust and gas floating in space

---

---

---

---

---

---

---

---

Gravity would cause dust particles and gas molecules to be attracted to each other  
As more and more particles of dust and gases were attracted the gravitational pull increases  
Soon, all dust and gas are consolidated

---

---

---

---

---

---

---

---

Where did the dust and gases come from?  
God made them – out of nothing  
If there is enough mass compressed together it would ignite into a star/sun

---

---

---

---

---

---

---

---

If there was not enough mass, the gravity would compress the dust and gas until it formed a molten sphere.  
Oxygen and hydrogen atoms would combine into water molecules

---

---

---

---

---

---

---

---

This would cause water to rain  
on the molten surface  
Be turned into steam and  
blown into space  
Only to cool and rain once  
more  
The end result would be a  
sphere covered in water

---

---

---

---

---

---

---

---

Genesis 1:2b:  
“And the spirit of God moved  
upon the face of the waters”  
Here is the reality of God’s  
testimony  
There was not a single  
creation...

---

---

---

---

---

---

---

---

According to God’s account  
there were at least seven  
God would give a command to  
create something  
That item would be created  
during that day  
The creation would be complete

---

---

---

---

---

---

---

---

God would then return and  
give a new creative command  
Then during that day the  
creative command would be  
obeyed and the next stage of  
creation would take place  
At the end of the day, that  
command would be complete

---

---

---

---

---

---

---

---

With a water-covered sphere, the  
gravity and the contained energy  
under the surface of the earth  
would collect gases, but the  
gases would be above the water  
This would create an atmosphere

---

---

---

---

---

---

---

---

When you have an atmosphere  
you have air that can reflect  
light  
When light is reflected at right  
angles, it can be seen  
So what does God command?  
"Let there be light!"

---

---

---

---

---

---

---

---

Now you have a water-covered sphere with an atmosphere and you can see because of reflected light – Night and Day  
But rocks dropped in a glass of water remain rocks dropped in a glass of water

---

---

---

---

---

---

---

---

God begins the next Creative Command  
He draws water together and He calls forth land  
While doing this there is water on the surface that gathers and there is water vapor that rises

---

---

---

---

---

---

---

---

We now have oceans and land  
We also have a cloud covering  
This water canopy will remain in place until the Flood  
It filters cosmic radiation, x-rays and microwave radiation

---

---

---

---

---

---

---

---

God commands vegetation to  
come forth

He establishes order and  
species

Each plant is to reproduce  
after its kind

Apples produce apples

---

---

---

---

---

---

---

This creates the carbon dioxide  
– oxygen cycle

This will result in the cloud  
covering being burned away

As a result, the sun, moon and  
stars are now visible from  
where Moses is standing

---

---

---

---

---

---

---

With plant life in place God  
creates other life: fish, birds,  
reptiles and mammals

God improves the  
environment one piece at a  
time

---

---

---

---

---

---

---

He does not create the next creation until there is an environment in place to sustain it  
God then creates man

---

---

---

---

---

---

---

---

At this point we move to Genesis Chapter Two  
God makes His second declaration in Genesis 1  
“I created man”  
“I created man and woman”

---

---

---

---

---

---

---

---

Chapter Two opens the next phase of the trial  
God now gives details of how He made man and woman  
He made man out of the dust of the ground  
Keep in mind He made the dust out of nothing

---

---

---

---

---

---

---

---

He then makes woman out of man  
Again, He had made man  
God is establishing His copyright over the earth  
Over everything in/on the earth  
All life on the earth

---

---

---

---

---

---

---

God is establishing His copyright over man and woman  
Over all mankind  
Why is this important?  
Because it establishes God's authority over His Creation

---

---

---

---

---

---

---

As Creator, God has the right to establish standards for His Creation  
He has the right to hold His Creation accountable  
He has the right to punish His Creation

---

---

---

---

---

---

---

If God is not the sole Creator,  
then He must share this  
copyright over mankind with  
someone else

If God made anything out of  
something owned by someone  
else He would have to share  
His authority

---

---

---

---

---

---

---

---

God – Father, Son and Holy  
Spirit – created everything out  
of nothing in order to have  
exclusive authority over  
Creation

But what if this were not true?

---

---

---

---

---

---

---

---

If God is not the sole Creator,  
then He would not have  
authority over earth, life and  
mankind

He would not have the right to  
set standards of performance  
for Adam and Eve [mankind]

---

---

---

---

---

---

---

---

As parents, we can set rules  
for our children  
We can enforce those rules  
We can punish our children  
But what if a neighbor down  
the street set rules for your  
children?

---

---

---

---

---

---

---

---

What if He tried to enforce his  
rules over your children?  
He is acting without authority  
He is a bully  
He is a tyrant  
He needs to be resisted  
He needs to be stopped

---

---

---

---

---

---

---

---

This is the foundation for the  
Creation versus Evolution  
debate  
Did God create us?  
Did we [or nature] create us?  
Does God have authority over  
us?

---

---

---

---

---

---

---

---

If God does not have authority  
over us, He cannot set  
standards  
He cannot enforce His  
standards  
He is a tyrant  
We need to fight Him

---

---

---

---

---

---

---

---

Let me give you my little  
speech on Evolution...  
Let's give the Evolutionist the  
benefit of the doubt  
Let's say that the right  
chemicals and enzymes and  
acids all came together

---

---

---

---

---

---

---

---

This pool of goo was in the  
right place at the right time  
when a bolt of lightning hit it  
And even though it takes life to  
produce life...  
In this case lifeless goo  
produced life

---

---

---

---

---

---

---

---

Let's give them that.  
How long did this take?  
40 – 50 Million Years?  
Wow! That was a long time to wait...  
But wait!

---

---

---

---

---

---

---

---

There's our life in the goo  
And it's dying  
The chemicals are toxic  
They are killing it  
It can't absorb oxygen  
Or discharge carbon dioxide  
Too late! It's dead

---

---

---

---

---

---

---

---

Okay...  
Let's be generous and give them a second try  
And this time we are going to make the universe intelligent  
And it will fix the problem with the new life: Life 2.0

---

---

---

---

---

---

---

---

Fifty million years later the right  
goo is in the right place and...  
ZAP!  
"IT'S ALIVE!"  
Don't forget Frankenstein  
Here is Life 2.0  
But wait...

---

---

---

---

---

---

---

Within a few days Life 2.0 is in  
trouble  
It can breathe, but it can't take  
in water and process it  
It's dying of thirst after just a  
few days  
Going...going...GONE!

---

---

---

---

---

---

---

How sad  
Shall we let them try one more  
time?  
They've put a lot of faith in this  
And the universe will keep the  
breathing fix in place  
And it will also fix drinking

---

---

---

---

---

---

---

Another 50 Million years  
A new pool of goo  
Another lightning ZAP; and  
Life 3.0!  
Let's watch it for a little while  
It's breathing...Fantastic  
It can drink...Alright!

---

---

---

---

---

---

---

---

That should do it...right?  
But wait!  
It's been over a month  
It's not looking too good is it?  
It's still breathing  
It's surviving the toxic chemicals  
It's drinking

---

---

---

---

---

---

---

---

But it can't eat  
It can't chew or swallow  
It can't absorb nourishment  
It's not looking good  
And before another month  
passes  
Bye bye!

---

---

---

---

---

---

---

---

That's a shame...  
It was looking so good  
What do you say?  
One more time?  
Pool of goo  
Lightning bolt  
Life 4.0

---

---

---

---

---

---

---

---

And look at what a great job  
random chance is doing  
It kept the ability to take in  
oxygen and discharge carbon  
dioxide  
It is surviving the toxic  
chemicals  
It can breathe in and out

---

---

---

---

---

---

---

---

Random chance fixed every  
problem  
Each life is not just life  
It is the original life  
And it is the improved model  
Here is life 4.0  
It can absorb nourishment

---

---

---

---

---

---

---

---

Wait a minute...  
It's in trouble  
There is no way to eliminate  
the waste products  
Life 4.0 is poisoning itself as it  
eats  
Going...going...GONE!

---

---

---

---

---

---

---

---

You know, I really thought they  
were going to make it  
We can't give up now, can we?  
Goo, lightning zap, Life 5.0  
This one HAS to work  
Look at that  
All these improvements

---

---

---

---

---

---

---

---

Surviving toxic chemicals  
Breathing  
Drinking  
Eating  
Eliminating waste  
Yes, this one is going to make  
it

---

---

---

---

---

---

---

---

Or is it?

It's consumed all the air, water  
and nourishment around it.

There is water and  
nourishment just a few feet  
away

Come on...MOVE!

Oh yeah...we forgot about that

---

---

---

---

---

---

---

---

I'm not giving up

I have faith in random chance

I'm going to make it happen  
again

Pool of Goo, Lighting Zap

Life 6.0

How many million years?

---

---

---

---

---

---

---

---

It doesn't matter

This is it

I can feel it

Toxic Chemicals, breathing,  
drinking, eating, elimination  
and movement.

That has to be it

---

---

---

---

---

---

---

---

Random chance kept all the improvement  
And random chance kept improving  
We have life  
SUCCESS!!!  
All in just 3 or 4 billion years

---

---

---

---

---

---

---

---

I'm going to sit here and enjoy this  
This is great  
This proves evolution  
Random chance got it right  
We just had to keep trying

---

---

---

---

---

---

---

---

We come back a few years later, and there it is:  
Life 6.0  
But, what's wrong?  
It's growing old  
It's dying  
It's...gone!

---

---

---

---

---

---

---

---

Well they say that the seventh  
time is the charm  
More goo, more lightning, keep  
the changes, add more fixes  
And now we have Life 7.0  
It can reproduce  
It can perpetuate the species

---

---

---

---

---

---

---

---

We come back a few years  
later and Life 7.0 is now old  
It is going to die  
Time to reproduce  
“What do you mean, ‘Where’s  
the mate?’”  
Ooops!

---

---

---

---

---

---

---

---

Well Life 8.0 will do better  
Random chance will fix it  
It will keep everything  
And this time it will make two!  
Yes, male and female  
I’m not stupid  
Six – Eight Billion Years

---

---

---

---

---

---

---

---

God gave me this example  
many years ago  
It shows the absurdity of  
Random Chance not just  
creating life, but of making a  
viable, surviving and  
reproducing life  
There's no way it can work

---

---

---

---

---

---

---

---

What surprised me is about ten  
years ago I was reading about  
the Nobel Prize Winners  
It was back when science  
insisted the universe was  
millions of years old

---

---

---

---

---

---

---

---

There was a man  
I forget his name  
But he came up with the same  
idea that I did  
Life by random chance is just  
not going to work  
He won a Nobel Peace Prize

---

---

---

---

---

---

---

---

Not for his realization  
No, he provided the solution  
for all of this  
He saved evolution  
There was no way that  
evolution could work  
So what did he do?

---

---

---

---

---

---

---

---

He moved the universe from  
millions of years old to billions  
of years old with no proof  
And even this wouldn't work  
So he added aliens  
An alien race had to help  
And THAT won him the prize!

---

---

---

---

---

---

---

---

Evolution would not work  
Intelligence analysis of the  
scenario proved it  
No evolution  
But they could not accept that  
If you don't have evolution you  
have to consider God

---

---

---

---

---

---

---

---

Can't do that  
Think of something  
Think of anything!  
ALIENS...flying saucers  
Have we proven flying saucers  
yet?  
Oh, just one more question

---

---

---

---

---

---

---

---

How did the Aliens get here?  
Where did they come from?  
The best part of building a  
house of cards is watching  
when it all falls down  
Evolutionist will ignore the  
facts to keep believing

---

---

---

---

---

---

---

---

Now we are talking science  
here...Right?  
How does science work?  
It uses something called...  
Wait for it...  
The Scientific Method!

---

---

---

---

---

---

---

---

How does the Scientific Method Work?

You observe the subject

You create a theory of how this works or what it does

You then test your theory to prove it is correct

---

---

---

---

---

---

---

---

The concept is that you test your theory

If your theory is correct...YEAH!

But if the theory is NOT correct

You set it aside

And start on a new theory

---

---

---

---

---

---

---

---

But when it comes to Creation versus Evolution

Scientists will not accept the fact that their theory does not work

They keep changing "facts" trying to make it work

This is "unreasonable faith"

---

---

---

---

---

---

---

---

It is unreasonable faith when they cannot find evidence to make their theory work but they keep believing  
You can't reason with someone who refuses to consider the evidence  
Or use logic to analyze the evidence?

---

---

---

---

---

---

---

---

Let me mention a new discovery coming onto the scene  
With the discovery of the genome  
And a map of the DNA strand  
We've discovered something

---

---

---

---

---

---

---

---

All human life has a common ancestor  
Isn't that what the Bible has said all along  
Of course, due to the Flood  
The ancestor is Noah, not Adam

---

---

---

---

---

---

---

---

Now lets shift over to the scientific arguments...  
The first argument is the Watchmaker Argument first presented by William Paley in the eighteenth century  
Paley was an Anglican clergyman

---

---

---

---

---

---

---

---

He held that if you have a watch, this implies that there had to be a watchmaker  
We accept this theory when we look at cars, planes, buildings, computers technology  
No one questions this

---

---

---

---

---

---

---

---

But then it comes to biological machines, scientists will not concede the point  
They claim physical laws are the watchmaker when it comes to us and life

---

---

---

---

---

---

---

---

Dr. Richard Dawkins – a supporter of Darwin – actually attributes our “watch” to having been made by a blind watchmaker – nature  
The laws of Nature and mutation will explain all of this

---

---

---

---

---

---

---

---

But mutations do not add information to the DNA strand  
Mutations take away  
You must add information to improve the DNA, not take away from it  
Mutations cannot improve us

---

---

---

---

---

---

---

---

At the time of Darwin the smallest living organism was a cell  
It was believed to have been a glob of “goo” contained within a membrane  
But now we know differently

---

---

---

---

---

---

---

---

A cell is filled with hundreds of “biometric machines”

These are small biological machines that perform various functions in each cell to make it work

Many of these machines could not have evolved

---

---

---

---

---

---

---

---

In order for the machine/cell to exist and work, the biometric machine had to appear and be fully functional when it first appears

The Law of Life (Biogenesis) holds that life must come from life

---

---

---

---

---

---

---

---

Evolution denies this and claims that life came from lifeless chemicals

---

---

---

---

---

---

---

---

There is also what is called the  
Anthropic Principle

The Anthropic Principle notes  
that various laws and  
processes are carefully  
balanced in such a way to  
support life

---

---

---

---

---

---

---

---

If these limits or balances were  
altered, life would cease to  
exist, chemical reactions  
would not take place, elements  
would not hold together

---

---

---

---

---

---

---

---

I want to share two things from  
a study presented by Geologist  
Andrew Snelling, PhD  
He is the Director of Research  
of Answers in Genesis

---

---

---

---

---

---

---

---

He noted that the Age of the Earth is the true battleground in this war

If we surrender on this one issue; then we have lost the war

It is THAT important

---

---

---

---

---

---

---

---

John 2:1 – 11:

This is the story of the Wedding Feast in Cana

They ran out of wine

Jesus instructed servants to fill six water pots with water

He changed the water into wine

---

---

---

---

---

---

---

---

This was Jesus' first miracle

What happened in this passage is a demonstration of God's creative powers

Jesus took simple hydrogen/oxygen molecules and transformed them into complex organic molecules

---

---

---

---

---

---

---

---

Jesus sent the wine along with the servants who saw what He did to the Ruler of the Feast  
The Ruler of the Feast tasted the wine and assumed that it had been produced from grapes grown on vines, crushed and fermented

---

---

---

---

---

---

---

---

He assumed this wine was from a process that took years  
He was wrong in His assumption  
Jesus created the wine to meet an immediate need  
The ruler did not ask, "Where did this come from?"

---

---

---

---

---

---

---

---

Jesus had provided the eye witnesses to the miracle  
He did not question the eye witnesses and assumed the wine he was tasting was years old created by natural means  
He could not tell the difference

---

---

---

---

---

---

---

---

We do this with Creation  
We assume and do not test  
the evidence  
God needed to create fully  
mature and fruit-producing  
trees immediately because in  
three days Adam and Eve  
would be created

---

---

---

---

---

---

---

---

Let me share Dr. Snelling's  
discussion on Radioactive  
Decay Theory  
This is a series of tests used  
by geologists to determine the  
age of rocks, minerals, fossils  
and other materials

---

---

---

---

---

---

---

---

There are radioactive elements  
in our world  
They are radioactive because  
these atoms are unstable  
They are unstable because  
there are too many subatomic  
particles in the nucleus

---

---

---

---

---

---

---

---

Nature seeks a balance  
It wants to bring stability to the atom by ejecting particles  
The atom will continue to do this until the atom is stable  
Here is what is happening in radioactive decay...

---

---

---

---

---

---

---

---

<u>Original Atom</u>	<u>Final Atom</u>
Carbon-14	Nitrogen-14
Uranium-238	Lead-206
Uranium-235	Lead-207
Potassium-40	Argon-40
Rubidium-87	Strontium-87
Samarium-147	Neodymium 143

---

---

---

---

---

---

---

---

Radioactive Dating takes a rock and measures the original unstable atom and the end result stable atom  
They look at this process as a kind of hourglass to measure the passing of time

---

---

---

---

---

---

---

---

In Dr. Snelling's example he identified the unstable atoms as red grains of sand  
He identified the stable atoms – the end product – as green grains of sand

---

---

---

---

---

---

---

---

The unstable atoms are called "Parent" atoms  
The converted stable atoms are called "Daughter" atoms  
Here is a copy of his Hourglass Analogy

---

---

---

---

---

---

---

---

Parent Atoms  
Red Sand Grains  
↓  
Radioactive Decay  
↓  
Daughter Atoms  
Green Sand Grains

---

---

---

---

---

---

---

---

The Radioactive Decay Dating works because it is based on three assumptions:

1. No Daughter Atoms Present
2. No Corruption
3. Constant Rate of Decay

---

---

---

---

---

---

---

---

The problem is that all three assumptions are wrong  
This has been proven by numerous volcanic eruptions  
Lava flows and hardens into basalt igneous rock

---

---

---

---

---

---

---

---

We know the age that these basalt igneous rocks were formed because we know the date of the eruptions

---

---

---

---

---

---

---

---

KNOWN ERUPTIONS  
Mt. St. Helens – 1980  
Hulalai Hawaii – 1800 – 1801  
Mt Etna, Sicily – 1972  
Mt Lassen, Ca – 1915  
Sunset Crater, Az – 1064-65

---

---

---

---

---

---

---

---

Basalt rock was dated using  
Radioactive Decay from each of  
these volcanoes:  
St Helens – 0.25 – 2.8 million  
Hawaii – 1.4 to 1.6 million years  
Sicily – 0.35 million years  
California – 0.11 million years  
Arizona - 0.25 million years

---

---

---

---

---

---

---

---

All these tests used Potassium  
to Argon radioactive decay  
Note:  
We do not dispute the quality of  
the testing  
We dispute the interpretation of  
the testing

---

---

---

---

---

---

---

---

We observed the formation of these rocks

The volcanic gases contained Argon gas

This gas was trapped in the lava as it cooled

Daughter atoms were present

---

---

---

---

---

---

---

---

Rocks are constantly having water passing through them and moving minerals around

This results in contamination

Mt. St. Helen also proved that radioactive decay rates are accelerated during Geological Catastrophes

---

---

---

---

---

---

---

---

Here's another interesting test result

They used the Potassium to Argon Radioactive Decay to date diamonds from Zaire

They were dated to be 6 billion years old

---

---

---

---

---

---

---

---

How old is the earth?

Per Evolutionists it is 4.56 billion years old

If this is true, then these diamonds were formed before the earth even existed!

---

---

---

---

---

---

---

---

All three assumption were proven to be wrong

This throws the Radioactive Decay Dating Method into question.

---

---

---

---

---

---

---

---

Ironically 90% of dating methods available prove that earth is a young world of < 10,000 yrs

Only 10% shows an older world

Why keep using these dating methods?

---

---

---

---

---

---

---

---

Because the scientist are beginning with an assumption of an old earth

They are not confronting or testing the evidence

They are beginning with assumptions

---

---

---

---

---

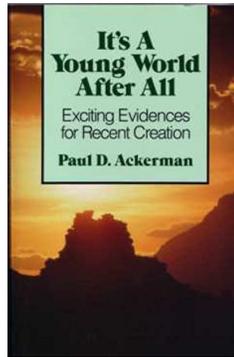

---

---

---

In "*It's A Young World After All*" (1986) Paul Ackerman studies "clocks" that are in the universe

The concept is that when Creation was complete, clocks in nature began to run

---

---

---

---

---

---

---

---

As an example, the sun consumes tons of matter every second

It is running down

How big would it have to have been billions of years ago?

---

---

---

---

---

---

---

---

Another clock is dust  
Dust falls on our world at a  
certain rate  
It is removed by storms, wind  
and house cleaning  
But is there a place dust could  
fall and be undisturbed?

---

---

---

---

---

---

---

There is...  
The moon  
It has no  
atmosphere  
There is no wind  
or storms  
Scientists  
speculated dust  
to be meters  
deep on the  
moon

---

---

---

---

---

---

---

Pre-Moon-Landing Science  
Fiction stories had astronauts  
falling into deep pits filled with  
dust  
After all, dust has been falling  
on the moon for millions of  
years

---

---

---

---

---

---

---

We built our lunar lander with pods to rest on top of the dust  
We expected dust to be a problem

---

---

---

---

---

---

---

---

But when Armstrong stepped onto the moon's surface there was little dust  
What does this tell us?

---

---

---

---

---

---

---

---

Dust has been falling on the moon for thousands of years, not billions of years  
Another clock is gravity  
Think of each planet as a vacuum cleaner – a roombot – moving through space

---

---

---

---

---

---

---

---

The gravity of each planet and moon would “suck up” dust, rocks and debris

If the planets had been moving through space for billions of years, there should be no dust, rocks or debris left to fall on the earth

---

---

---

---

---

---

---

---

But there is still a lot of dust, rocks and debris out there

Our planetary roombots have been running for thousands of years – not billions

---

---

---

---

---

---

---

---

Then comes the big one

Erosion and petrification

We are told the Grand Canyon proves millions of years of erosion

The Petrified Forest took millions of years to form

---

---

---

---

---

---

---

---

On May 18, 1980  
all of this was  
challenged and  
proven wrong

On May 18, 1980  
Mount Saint  
Helens erupted

In the aftermath  
scientist  
discovered the  
truth

---

---

---

---

---

---

---

---

The Grand Canyon, coal,  
petrified wood was the result  
of a massive geological  
upheaval and not years of  
slow changes

Rock formed by the eruption  
dated millions of years even  
though only a few months old

---

---

---

---

---

---

---

---

Logs were found that were  
wood on one end, coal in the  
middle and petrified wood on  
the other

Everything we attribute to slow  
erosion can be explained by  
the Genesis Flood

---

---

---

---

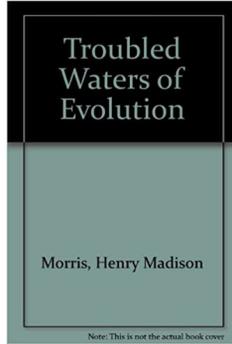

---

---

---

---

Henry Morris, a respected Christian Scientist, noted in his work The Troubled Waters of Evolution...

---

---

---

---

---

---

---

---

Dr. Morris noted that fossils are not currently being made  
Organisms died, they are buried, they decay  
It take a geological upheaval to instantly bury something to make a fossil – The Flood

---

---

---

---

---

---

---

---

Many of the dating techniques only work because of consistency  
But what if things are not constant?  
With the collapse of the water canopy rate of decay changed

---

---

---

---

---

---

---

---

Even the speed of light which was believed to be a constant is now showing signs of slowing down

---

---

---

---

---

---

---

---

Is all of this a big deal?  
Does it matter?  
Yes, it does  
In addition to dealing with whether God has authority over us, it deals with the credibility of the Bible

---

---

---

---

---

---

---

---

Exodus 20:9 – 11:  
“Six days shall you labor, and do all your work:  
But the seventh day is the Sabbath of the Lord your God: in it you shall not do any work...”

---

---

---

---

---

---

---

---

“...For in six days the Lord made heaven and earth, the sea, and all that in them is, and rested the seventh day: wherefore the Lord blessed the Sabbath day, and hallowed it.”

---

---

---

---

---

---

---

---

Here God specifically connects the six 24-hour days that man is to work with six 24-hour days of the Creation  
If they were not six 24-hour days; then God is wrong.

---

---

---

---

---

---

---

---

Matthew 19:4:  
“And [Jesus] answered and said unto them, Have you not read, that He who made them at the beginning made them male and female...”

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

We cannot have it both ways  
Either Creation took six 24-  
hour days, or God is lying  
If we look at the fossil records,  
there is evidence of animals  
eating animals, thorns on  
plants and even disease

---

---

---

---

---

---

---

---

If all of this existed before  
Adam and Eve sinned in the  
Garden; the Creation was not  
perfect  
The fossil evidence must take  
place AFTER the Fall or during  
the Flood

---

---

---

---

---

---

---

---

If we do not take Creation, the Fall and the Flood as literal accounts of actual events; then there is no logical basis to see the rest of the Bible as literal.

---

---

---

---

---

---

---

---

Creation versus Evolution  
Does it make a difference?  
It makes all the difference in the world  
Six 24-hour days versus billions of years?  
God declared this...

---

---

---

---

---

---

---

---

Is God a tyrant we should fight?  
Is God a liar?  
Is this literal or myth?  
As our faith and salvation are built on the literal application of the Bible – all the Bible...

---

---

---

---

---

---

---

---

Let me wrap up by taking this argument to its logical conclusion  
Let me now present the Moral Argument  
Most people do not “think it through”  
And they hold onto arguments without realizing the full scope of embracing such an argument

---

---

---

---

---

---

---

---

What final conclusion does Evolution make?

---

---

---

---

---

---

---

---

When Thomas Jefferson wrote the *Declaration of Independence* it was a written legal argument  
Notice some of the points he used in making his argument

---

---

---

---

---

---

---

---

We hold these truths **to be self-evident**, that all men are **created equal**...

...That they are **endowed by their Creator** with certain **unalienable Rights**...

---

---

---

---

---

---

---

---

...That among these are Life, Liberty and the pursuit of Happiness..."

---

---

---

---

---

---

---

---

Thomas Jefferson's entire legal argument is based upon three points:

1. There is a God
2. We were created; and
3. God gave us rights

---

---

---

---

---

---

---

---

Without creation:  
We were not created  
Without creation:  
We were not given rights by our  
Creator

---

---

---

---

---

---

---

---

Therefore, without creation:  
We have no rights  
Without Creation government can  
do what it wants

---

---

---

---

---

---

---

---

Without Creation:  
There is no higher authority to  
appeal to  
Without Creation:  
We have no legal basis to stop  
what they do

---

---

---

---

---

---

---

---

Without Creation:

It becomes the rule of Might  
makes Right

The Government has the Might  
Government can do what it wants

---

---

---

---

---

---

---

---

The only way to stop abuse  
Is to become Mightier  
And through force – not logic –  
stop the greater force

---

---

---

---

---

---

---

---

So...where does Evolution  
leads us?

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

If Darwin is correct  
And the rule of nature is: *The survival of the fittest*  
It then becomes the goal of the human race  
To improve itself at any cost!

---

---

---

---

---

---

---

---

In the eyes of Evolution  
There is no morality  
There is no code of conduct  
It is only the most fit who should survive  
And those most fit will have the might...

---

---

---

---

---

---

---

---

In the eyes of Evolution  
Hitler should be a hero – one we  
should try to copy

---

---

---

---

---

---

---

---

He did what each government  
should do  
He sought to create a Master  
Race of superior beings  
He was willing to pay whatever  
price was necessary

---

---

---

---

---

---

---

---

To jump the human race several  
generations further along the  
evolutionary path  
In the eyes of Evolution  
The Holocaust was a good idea

---

---

---

---

---

---

---

---

It was a necessary idea  
That should be practiced at least  
once every generation

---

---

---

---

---

---

---

---

Those who are not strong  
And do not improve the race...  
Should not be allowed to drain the  
resources of the entire race

---

---

---

---

---

---

---

---

Therefore medical treatment and  
surgeries should not be allowed  
Except as experiments to  
improve the race

---

---

---

---

---

---

---

---

Welfare and charity programs  
should not be allowed  
The old and disabled should be  
“removed” from society

---

---

---

---

---

---

---

---

Those who are not fit  
Would have no place in society  
They would have no rights  
And, therefore, they cannot be  
victims

---

---

---

---

---

---

---

---

They are only obstacles to the  
human race’s goal of a better  
species  
Obstacles society must remove  
for the good of the race

---

---

---

---

---

---

---

---

Mercy, love and compassion  
Would have no place in such a  
society  
Because it would allow those less  
fit to survive

---

---

---

---

---

---

---

---

Those less fit should only survive  
To be experimented on  
Or as slave labor

---

---

---

---

---

---

---

---

And if another race were to be  
revealed  
That was more powerful than us  
And further along the Evolutionary  
Path than us  
We would cease to exist

---

---

---

---

---

---

---

---

No one would miss us  
No one would mourn over us

---

---

---

---

---

---

---

---

It this really  
what we believe?

---

---

---

---

---

---

---

---

**QUESTIONS**

---

---

---

---

---

---

---

---
